Parents and teachers today face a swirl of conflicting theories about child rearing and educational practice. Indeed, current guides are contradictory, oversimplified, and at odds with current scientific knowledge. Now, in *Awakening Children's Minds*, Laura Berk cuts through the confusion of competing theories, offering a new way of thinking about the roles of parents and teachers and how they can make a difference in children's lives. This is the first book to bring to a general audience, in lucid prose richly laced with examples, truly state-of-the-art thinking about child rearing and early education. Berk's central message is that parents and teachers contribute profoundly to the development of competent, caring, well-adjusted children. In particular, she argues that adult-child communication in shared activities is the wellspring of psychological development. These dialogues enhance language skills, reasoning ability, problem-solving strategies, the capacity to bring action under the control of thought, and the child's cultural and moral values. Berk explains how children weave the voices of more expert cultural members into dialogues with themselves. When puzzling, difficult, or stressful circumstances arise, children call on this private speech to guide and control their thinking and behavior. In addition to providing clear roles for parents and teachers, Berk also offers concrete suggestions for creating and evaluating quality educational environments--at home, in child care, in preschool, and in primary school--and addresses the unique challenges of helping children with special needs. Parents, Berk writes, need a consistent way of thinking about their role in children's lives, one that can guide them in making effective child-rearing decisions. *Awakening Children's Minds* gives us the basic guidance we need to raise caring, thoughtful, intelligent children.

Every person has a story, a personal narrative that informs their life, their decisions, and their way of thinking. But did you know that it also affects the wiring of your brain? Renowned psychiatrist and professor at Harvard Medical School John Sharp, M.D., offers an eight-step process to discovering your unconscious narrative and using your new insight to eradicate the "false truth" that has been at the core of your self-sabotage. His unique approach integrates four core domains of applied psychology—control mastery theory, attachment theory, narrative therapy, and positive psychology—with his own research and professional experience to construct an insightful and soul-searching path to insight. Throughout his step-by-step process, Dr.Sharp provides: · The “Sharp Focus” to distill and emphasize important concepts · Quizzes to help you analyze your internal and external tendencies · “First Impressions” case studies from his professional practice · Awareness, insight, change, and narrative tools to facilitate your transformation · “Gut Checks” to help you figure out if you are ready to move on to the next step in the process Dr. Sharp's approach is simple and accessible, with the power to wield profound results. Through exercises, quizzes, thorough exploration of case studies, and clear guidance, you will be able to find your false truth, rewrite your story, and transform your life. Once you have flipped the switch of insight, nothing can hold back the light that shines from within.

This book provides introductory coverage of growth and development throughout the lifespan. The content emphasizes normal aspects as well as the unique problems and health promotion needs of each age and stage of development. It features a strong health promotion theme structured around Healthy People 2020 objectives. Lifespan coverage from prenatal development to death helps students integrate concepts related to normal changes in each stage of the life cycle. Coverage of current research and trends in health care provide readers with the most up-to-date, accurate information. Health promotion and disease prevention, including Healthy People 2020 objectives, are highlighted throughout the book. Cultural content is highlighted throughout the book and in new Chapter 3: Cultural Considerations in Health Care to encourage students to consider cultural implications at every stage of development. Separate chapter on advanced old age and geriatrics (Chapter 14) discuss the theories, physiological changes, and psychological aspects of aging; health promotion and maintenance; and the role of health care providers in caring for the geriatric patient. All of this helps students understand how to maintain quality of life and promote health in advanced old age. Teaching techniques for every developmental stage are part of a consistent chapter format and provide age-appropriate patient education tips. Consistent chapter organization for each stage of growth and development makes information easy to access. Critical Thinking scenarios and questions appear at the end of each chapter to help students consider all variables when planning care across the lifespan. Student learning features include Objectives, Key Terms, Key Points, and Review Questions. Appendix A includes the FDA's Recommended Child and Adult Immunization Schedules, providing essential health promotion information. NEW Appendix B provides a Multilingual Glossary of Symptoms to enhance students' awareness of culturally sensitive care. Glossary includes definitions of Key Terms and additional terms help students review concepts and terminology at a glance. Bibliography is organized by chapter at the end of the book to facilitate additional research and study.

Japan's greatest seer, the blind prophet Hinoto, has foretold the end of the world. At the center of her prophecy is a young man named Kamui Shiro, who possesses startling psychic powers. Although Kamui's future seems to have been predetermined from his birth, he has a choice--save the earth, or destroy it.
