work. Ernest Thompson Seton combined his Woodcraft manual, the Birch Bark Rolls, with Baden-Powell's Scouting for Boys. Subsequent works were done by other authors. William "Green Bar Bill" Hillcourt wrote the 6th, 7th, and 9th editions. Frederick L. Hines wrote the 8th, and Robert Birkby the 10th, 11th and 12th editions. The first Official Handbook, subtitled A Handbook of Woodcraft, Scouting, and Life-craft was published from July 1910 until March 1911 and appeared in eight distinct variations. It was written by Ernest Seton and drew greatly on Baden-Powell's Scouting for Boys, it included information on the organization of Scouting, signs and signaling, and camping, as well as Scouting games and a description of several Scouting honours. Notably, this book did not place emphasis on first aid, knife and axe use, or map and compass work, as later editions would.

An extraordinary journey alongside America's new generation of Eagle Scouts, who are discovering their purpose and bringing the values of Scouting to the world. Over the past century, Scouts have helped to guide the course of American history. But what does Scouting and the Eagle badge mean to the Scouts of today? How will they shape the future of Scouting and America itself? In *Spirit of Adventure*, Scouting expert and Eagle Scout Alvin Townley finds the answer. Townley traveled across the country and to the far corners of the globe to meet these young Eagle Scouts. He found them everywhere, continuing the life of adventure and service that they had begun in Scouting. He discovered them in Afghanistan providing medical care to villagers, in Australia saving coral reefs, at the Super Bowl and Olympic venues striving for victory, on desert cliffs and at inner-city

schools teaching new lessons, in Africa bringing hope to children, and on the windswept deck of the aircraft carrier USS Nimitz preparing for takeoff. Whether doctors, activists, servicemen, entrepreneurs, or teachers, these young men are changing the world through bold actions that capture the essence of the Scouting tradition. In *Spirit of Adventure*, Townley answers important questions about the future of Scouting and America, while revealing stories of service, courage, and pure excitement that introduce our nation to an inspiring new generation of leaders.

Growing up in suburban Detroit, David Hahn was fascinated by science, and his basement experiments—building homemade fireworks, brewing moonshine, and concocting his own self-tanning lotion—were more ambitious than those of

other boys. While working on his Atomic Energy badge for the Boy Scouts, David ' s obsessive attention turned to nuclear energy. Throwing caution to the wind, he plunged into a new project: building a nuclear breeder reactor in his backyard garden shed. In *The Radioactive Boy Scout*, veteran journalist Ken Silverstein recreates in brilliant detail the months of David ' s improbable nuclear quest. Posing as a physics professor, David solicited information on reactor design from the U.S. government and from industry experts. (Ironically, the Nuclear Regulatory Commission was his number one source of information.) Scavenging antiques stores and junkyards for old-fashioned smoke detectors and gas lanterns—both of which contain small amounts of radioactive material—and following blueprints he found in an outdated physics textbook, David cobbled

together a crude device that threw off toxic levels of radiation. His unsanctioned and wholly unsupervised project finally sparked an environmental catastrophe that put his town ' s forty thousand residents at risk and caused the EPA to shut down his lab and bury it at a radioactive dumpsite in Utah. An outrageous account of ambition and, ultimately, hubris that sits comfortably on the shelf next to such offbeat science books as *Driving Mr. Albert* and stories of grand capers like *Catch Me If You Can*, *The Radioactive Boy Scout* is a real-life adventure with the narrative energy of a first-rate thriller.
