International Mindedness is a practical handbook which offers continuing professional development (CPD) solutions, support and guidance for international schools on a professional and whole-school level. It aims to encourage schools to work towards being 'internationally minded' and to enhance existing international teacher CPD programmes.

Endorsed by Cambridge International Examinations. Support students in mastering the ideas and skills needed to proceed successfully through the Cambridge Primary Science curriculum framework with a wide range of activities and investigations to help you deliver the science mastery approach. - Establish previous knowledge, skills and understanding of concepts through engaging activities at the start of each unit - Determine whether students have properly mastered the objectives for each unit with investigations and recap activities at the end - Expand vocabulary and understanding with key scientific words to learn and practice - Encourage peer assessment with talk partner activities throughout - Inspire students to predict and question outcomes and concepts with investigations that demonstrate and test key scientific points - Evaluate learning with a self-assessment checklist at the end of each unit and a practice test at the end of each chapter for summative assessment purposes

The Routledge Encyclopedia of Language Teaching and Learning is an authoritative reference dealing with all aspects of this increasingly important field of study. Offering a comprehensive range of articles on contemporary language teaching and its history, it has been produced specifically for language teaching professionals and as a reference work for academic studies at postgraduate level. In this new edition, every single entry has been reviewed and updated with reference to new developments and publications. Coverage has been expanded to reflect new technological, global and academic developments, with particular attention to areas such as online and distance learning, teacher and learner cognition, testing, assessment and evaluation, global English and teacher education. Themes and disciplines covered include: Methods and materials, including new technologies and materials development Contexts and concepts, such as mediation, risk-taking in language learning and intercomprehension Influential figures from the early days of language teaching to the contemporary Related disciplines, such as psychology, anthropology and corpus linguistics It covers the teaching of specific languages, including Japanese, Chinese, Arabic and African languages, as well as English, French, German and Spanish. There are thirty five overview articles dealing with issues such as communicative language teaching, early language learning, teacher education and syllabus and curriculum design. A further 160 entries focus on topics such as bilingualism, language laboratories and study abroad. Numerous shorter items examine language and cultural institutions, professional associations and acronyms. Multiple cross-references enable the user to browse from one entry to another, and there are suggestions for further reading. Written by an international team of specialists, the Routledge Encyclopedia of Language Teaching and Learning is an invaluable resource and reference manual for anyone with a professional or academic interest in the subject.

This volume documents international, national, and small-scale testing and assessment projects of English language education for young learners, across a range of educational contexts. It covers three main areas: age-appropriate 'can do statements' and task types for teaching and testing learners between the ages of 6 to 13; innovative approaches to self-assessment, diagnostic testing, self-perception, and computer-based testing; and findings on how young learners perform on vocabulary, listening, speaking, pronunciation, and reading comprehension tests in European and Asian contexts. Early language learning has become a major trend in English language education around the globe. As a result of the spread of teaching English to a growing number of young children, assessment of and for learning have emerged as key issues. In line with this development, there is a clear and emerging need to make early language programs accountable and to assess both the progress children make over time and to quantify their achievement at various stages of development. This volume informs stakeholders about the realistic goals of early language learning, their efficiency, and how much progress children make over time.

Thinking Mathematically is perfect for anyone who wants to develop their powers to think mathematically, whether at school, at university or just out of interest. This book is invaluable for anyone who wishes to promote mathematical thinking in others or for anyone who has always wondered what lies at the core of mathematics. Thinking Mathematically reveals the processes at the heart of mathematics and demonstrates how to encourage and develop them. Extremely practical, it involves the reader in questions so that subsequent discussions speak to immediate experience.

The results of more than seventy years of investigation, by factor analysis, of the varieties of cognitive abilities, are described with particular attention to abilities in language, thinking, memory, visual and auditory perception, creativity, etc.

This collection in honor of creolist Charlene Junko Sato (1951–1996) brings together contributions by leading specialists in pidgin-creole studies in three primary areas: Pidgin-Creole Genesis and Development; Attitudes and Education, and Creole Discourse and Literature. The varieties covered come from English, French and Spanish lexical bases and from places as far apart as Africa, Australia, Hawaii, and the Caribbean. Editors Rickford and Romaine introduce each of the papers and provide a biography and bibliography of Sato. A short story and poems in Hawaiian Creole, Sato's native language and the variety which was the focus of her research and writing, round out the collection.

This book examines Malaysia's educational landscape, providing a contemporary study of key themes that have emerged in this multicultural, multi-ethnic society, as it attempts to shift from a middle-income to a high-income nation. Combining contributions by scholars from various fields—such as economics, history, sociology, political science and, of course, education—the book provides richer insights into Malaysia. Offering a unique resource, it will be of particular interest to educators, researchers, students, policymakers and members of the public who want to be updated on the latest trends and challenges in Malaysian education.

With contributions from leading school psychology practitioners, this encyclopedia provides a one-of-a-kind guide to cross-cultural school psychology. Some 400 entries explore concepts, themes, and the latest research findings to answer your questions in all aspects of the field. Moreover, the encyclopedia offers support at all levels of primary and secondary education, from pre-K to 12th grade. Each entry offers a description of a particular term, a bibliography, and additional readings. The editor is widely known for her bi-weekly Spanish-language columns and her appearances on television and radio as a cross-cultural expert.
