NEW YORK TIMES BESTSELLER • The founder of the first female-focused recovery program offers a groundbreaking look at alcohol and a radical new path to sobriety. " You don ' t know how much you need this book, or maybe you do. Either way, it will save your life. " —Melissa Hartwig Urban, Whole30 co-founder and CEO We live in a world obsessed with drinking. We drink at baby showers and work events, brunch and book club, graduations and funerals. Yet no one ever questions alcohol ' s ubiquity—in fact, the only thing ever questioned is why someone doesn ' t drink. It is a qualifier for belonging and if you don ' t imbibe, you are considered an anomaly. As a society, we are obsessed with health and wellness, yet we uphold alcohol as some kind of magic elixir, though it is anything but. When Holly Whitaker decided to seek help after one too many benders, she embarked on a journey that led not only to her own sobriety, but revealed the insidious role alcohol plays in our society and in the lives of women in particular. What ' s more, she could not ignore the ways that alcohol companies were targeting women, just as the tobacco industry had successfully done generations before. Fueled by her own emerging feminism, she also realized that the predominant systems of recovery are archaic, patriarchal, and ineffective for the unique needs of women and other historically oppressed people—who don ' t need to lose their egos and surrender to a male concept of God, as the tenets of Alcoholics Anonymous state, but who need to cultivate a deeper understanding of their own identities and take control of their lives. When Holly found an alternate way out of her own addiction, she felt a calling to create a sober community with resources for anyone questioning their relationship with drinking, so that they might find their way as well. Her resultant feminine-centric recovery program focuses on getting at the root causes that lead people to overindulge and provides the tools necessary to break the cycle of addiction, showing us what is possible when we remove alcohol and destroy our belief system around it. Written in a relatable voice that is honest and witty, *Quit Like a Woman* is at once a groundbreaking look at drinking culture and a road map to cutting out alcohol in order to live our best lives without the crutch of intoxication. You will never look at drinking the same way again.

Recovering addicts are faced with many challenges, and these challenges can often extend to their romantic partners. During the recovery period, couples often struggle with overcoming feelings of betrayal and frustration, and may have a hard time rebuilding trust and closeness. While there are many resources available to recovering addicts, there are limited resources for the people who love them. In *Loving Someone in Recovery*, therapist Beverly Berg offers powerful tools for the partners of recovering addicts. Based in mindfulness, attachment theory, and neurobiology, this book will help readers sustain emotional stability in their relationships, increase effective communication, establish boundaries, and take real steps toward reigniting intimacy. The material in this book is drawn from the author ' s successful *Conscious Couples Recovery Workshop*. With more than 25 years in the field, she has developed a unique set of exercises that address the issues faced by couples in recovery. This book addresses the roles that both partners play in recovery, and aims to help readers develop a new appreciation for one another and improve self-confidence and acceptance. The road to recovery is never an easy one, but by building a strong support system, the chances of success are exponentially greater. This book explores the life and theories of Michael Balint, who kept alive Ferenczi's analytic traditions in Budapest and brought them to London, where they became a vital part of the Independent Group's theory and practice. Balint's theoretical understanding of regression, 'new beginnings', 'basic fault', as well as his profound impact on medicine, are all described. The work in the Balint groups by general practitioners, psychiatrists, and physicians are explored. Whole person and psychosomatic medicine, championed by Balint, is contrasted with today's more compartmentalised approach to medicine, including the increasing separation of the GP from the family. In the second part of the book Dr Sklar reflects on the complex tasks involved in psychodynamic assessment. Vignettes illustrate the importance of understanding the forces in family dynamics, the value of an early memory and a dream, and the sexual life of the patient. The author argues that Balint's ideas are of particular significance to us today, in our world of quick fixes and the overspecialisation of medicine.

What to do when food is NOT your best friend. According to a recent *Self Magazine*, 65% of all women have an unhealthy relationship with food. Often they use food to numb feelings and become binge eaters or overeaters. Food becomes their primary means for coping with everyday stress, anxiety, and other difficult feelings. Drawing on her experience of working with compulsive overeaters and binge eaters for over twenty years, Meryl Beck has developed a revolutionary

approach for rewiring your brain that incorporates spiritual, physical and emotional tools for getting healthy. This 21 day plan brings together tools from psychotherapy, the 12 Steps, personal growth, work, and energy healing. Stop Eating Your Heart Out offers a way to rewire the brain to respond differently to the impulses and feelings that create bingeing. Beck, a therapist, and former binge takes an approach to recovery from emotional eating that incorporates spiritual, emotional, and energy work.
