Classically trained pianist and singer Natalie Curtis isolated herself for five years after a breakdown just before she was to debut with the New York Philharmonic. Guilt-ridden and songless, Natalie can't seem to recapture the joy music once brought her. In 1902, her brother invites her to join him in the West to search for healing. What she finds are songs she'd never before encountered--the haunting melodies, rhythms, and stories of Native Americans. But their music is under attack. The US government's Code of Offenses prohibits American's indigenous people from singing, dancing, or speaking their own languages as the powers that be insist on assimilation. Natalie makes it her mission not only to document these songs before they disappear but to appeal to President Teddy Roosevelt himself, who is the only man with the power to repeal the unjust law. Will she succeed and step into a new song . . . and a new future? Award-winning author Jane Kirkpatrick weaves yet another lyrical tale based on a true story that will keep readers captivated to the very end.

"To achieve consistency of exit competencies among graduates from different schools and regions, the North American Process Technology Alliance identified a core technical curriculum for the Associate Degree in Process Technology. This core consists of eight technical courses and is taught in alliance member institutions throughout the United States. Instructors who teach the process technology core curriculum, and who are recognized in industry for their years of experience and depth of subject matter expertise, requested that a textbook be developed to match the standardized curriculum. A broad range of reviewers from process industries and educational institutions participated in the production of these materials so that the presentation of content would address the widest audience possible. This textbook is intended to provide a common national standard reference for the Instrumentation course in the Process Technology degree program"--
