This book analyses how the European Union translates its principles of peace and justice into policy and puts them into practice, particularly in societies in or emerging from violent conflict. The European Union treaty states that in its relations with the wider world, the EU is to promote peace, security, the protection of human rights, and the strict observance and the development of international law. The EU is active in peace processes around the world, yet its role in international peace mediation is largely ignored. This book offers the first scholarly analysis of how the EU engages in peace processes and justice for human rights violations, focussing on the point where mediation and transitional justice intersect. Drawing on extensive fieldwork, the book includes case studies of how the EU sought to promote peace and justice in the Democratic Republic of Congo (DRC), how it supports international justice through the International Criminal Court, and a model of the EU as a mediator. These provide an evidence-base for policy makers and practitioners as well as strong empirical contributions to theory. The book addresses whether and how the EU pursues its principles of both peace and justice in conflict zones, where, in practice, these principles may be in conflict, and the implications of these findings for understanding EU foreign policy and the EU as a security actor. This book will be of much interest to students of EU

foreign policy, transitional justice, peace and conflict studies and security studies.

This book critically examines the process of statebuilding by the EU, focusing on its attempts to build Member States in the Western Balkan region. This book analyses the European Union's policies towards, and the impact they have, upon the states of the Western Balkans, and assesses how these affect the nature of EU foreign policy. To this end, it focuses on the tools and mechanisms that the EU employs in its enlargement policy and examines the new instruments of direct intervention (in Bosnia and Kosovo), political coercion (in the case of Croatia and Serbia in relation to the International Criminal Tribunal for the former Yugoslavia), and stricter conditionality in the Western Balkan countries. The book discusses the key aim of this special form of statebuilding, which is to establish functional liberal-democratic states in Albania, Bosnia and Herzegovina, Croatia, Kosovo, Macedonia, Montenegro, and Serbia in order for them to join the EU and to cope with the responsibilities and pressures of membership in the future. However, the authors argue that while the EU sees itself as an international actor that promotes and protects liberal-democratic values, norms and principles, its experiences in the Western Balkans demonstrate how the EU's actions in the region have undermined the

basic principles of democratic decision-making (such as the European support for impositions in Bosnia) and international law (Kosovo), and have consequently contributed to new tensions (see police reform in Bosnia, and the tensions between Kosovo and Serbia) and dependencies. This book will be of much interest to students of statebuilding, EU politics, global governance and IR/Security Studies in general.

The European Union has increasingly taken on a role as international security provider that extends beyond the geographical scope of its membership. This is clear from the wide range of military and civilian crisis management missions that the Union has undertaken, but also identifiable through its other policies, such as the European Neighbourhood Policy and development assistance, which have also to some extent become security focused. Yet, the role of the EU as an international security provider remains under-theorized and weakly understood. The proposed book analyses the Union's role as an international security provider in a comprehensive way developing theoretical as well as empirical grounding for the understanding of the making and implementation of EU security policy. The contributions in this book cover actors involved in the policy making process, the dynamics of this process itself, its outcomes (strategies and policies) and their impact on

the ground. They examine the relevance of, and apply, existing theories of international relations, international security and foreign policy analysis to the specific case of the EU, investigate empirically how particular policies are formulated and implemented, and study the impact and effectiveness of the Union as an international security provider in a variety of cases compared. This book was previously published as a special issue of Global Society.

Despite the diverse interests of Presidents, Congress, and the State Department, this book argues that US foreign policy on transitional justice is surprisingly consistent, characterised by an approach that is value-driven, strategic, and retributive, and that has influenced the field as a whole.

Now in a fully updated edition, this essential text explores the other half of Europe—the new and future members of the European Union along with the problems and potential they bring to the region and to the world stage. Clear and comprehensive, it offers an authoritative and up-to-date analysis of the transformations and realities in Central and Eastern Europe, the Baltics, and Ukraine. Divided into two parts, the book presents a set of comparative country case studies as well as thematic chapters on key issues, including EU and NATO expansion, the economic transition and its social

ramifications, the role of women, persistent problems of ethnicity and nationalism, and political reform. Leading scholars provide the historical context for the current situation of each country in the region. They explain how communism ended and how democratic politics has emerged or is struggling to emerge in its wake, how individual countries have transformed their economies, how their populations have been affected by rapid and wrenching change, and how foreign policy making has evolved. New to this edition are chapters on social issues and transitional justice. For students and specialists alike, this book will be an invaluable resource on the newly democratizing states of Europe.

The failure to fulfil economic, social and cultural rights and the outright violation of these rights are often at the root of conflict. Furthermore, the actions and omissions by States and non-State actors during conflict can also amount to violations of economic, social and cultural rights, and particularly affect the most vulnerable. Yet, there has been no widespread move in transitional justice processes to examine the root causes of the conflict or to look into violations of economic, social and cultural rights. The Office of the United Nations High Commissioner for Human Rights has explored in greater depth the ways in which transitional justice processes have addressed or could

address violations of economic, social and cultural rights. This publication presents the outcome of that work.
