I will be focusing on the selected part of the diagram below for this guide using two Ubiquiti Nanostation M2's. You can use this setup to create a link between office buildings up to 50miles (depending on the device)

How to setup a basic Point to Point link using Ubiquiti ...

NanoStation M2 or M2 LOCO. 2 sets of Ethernet cable. Mounting pole or bracket. Basic tools (drill, pliers, etc) If you're not familiar with Power-over-Ethernet (PoE), it's a brilliant technology that allows sending low voltage (24V) over standard Ethernet cable to power devices like our NanoStation.

How to extend WiFi coverage using an Ubiquiti NanoStation

Hello.I am DIYing 2x M2 locos.At home I preconfigured both m2s and tested them over a view meters. All worked well.Then I installed one at my house and one at my buddy 200m away.Mine I can access. The other one I could not. I got on the roof and saw that the signal lights are flashing alternatively,
