Integrating the discipline of martial arts and Zen wisdom, the author utilizes special visualization techniques, mind-body exercises, and inspiration to help individuals find the path to mastery

From the bestselling author of The 48 Laws of Power and The Laws of Human Nature, a vital work revealing that the secret to mastery is already within you. Each one of us has within us the potential to be a Master. Learn the secrets of the field you have chosen, submit to a rigorous apprenticeship, absorb the hidden knowledge possessed by those with years of experience, surge past competitors to surpass them in brilliance, and explode established patterns from within. Study the behaviors of Albert Einstein, Charles Darwin, Leonardo da Vinci and the nine contemporary Masters interviewed for this book. The bestseller author of The 48 Laws of Power, The Art of Seduction, and The 33 Strategies of War, Robert Greene has spent a lifetime studying the laws of power. Now, he shares the secret path to greatness. With this seminal text as a guide, readers will learn how to unlock the passion within and become masters.

I used to ask questions that fell flat: Why am I so down on myself? How do I shut off these constant thoughts? Why is every day so robotic and dreary? It's hard for me to believe that those ideas kick-started my day, but it explains why my days were full of challenges. After three visits to alcohol recovery, I started to wake up. Today I can honestly say that I know who I am. I know my gifts, and I am grateful that every morning I wake again to a new day. I also know what I am not, and I don't waste time doing things I'm not called to do. People make up their mind to be successful, but they must have principles in place to keep moving each and every day. That's the life mastery way of living. I invite you to try it out. The keys are in this book.

Napoleon Hill summed up his philosophy of success in Think and Grow Rich!, one of the bestselling inspirational business books ever. A recent USA Today survey of business leaders named it one of the five most influential books in its field, more than 40 years after it was first published. Now, in Napoleon Hill's Keys to Success, his broadly outlined principles are expanded in detail for the first time, with concrete advice on their use and implementation. Compiled from Hill's teaching materials, lectures, and articles, Napoleon Hill's Keys to Success provides mental exercises, self-analysis techniques, powerful encouragement, and straightforward advice to anyone seeking personal and financial improvement. In addition to Hill's many personal true-life examples of the principles in action, there are also contemporary illustrations featuring dynamos like Bill Gates, Peter Lynch, and Donna Karan. No other Napoleon Hill book has addressed these 17 principles so completely and in such precise detail. For the millions of loyal Napoleon Hill fans and for those who discover him each year, Napoleon Hill's Keys to Success promises to be a valuable and important guide on the road to riches.

The Resilience Institute surveyed over 20,000 people to understand what drives resilience in individuals and groups across the world. 11 key factors were identified. These range from the obvious - focus, purpose, optimism, assertiveness and bounce - to the less expected - sleep quality, vitality, presence, decisiveness, values alignment and fulfilment. A resilient person breaks down life's challenges into achievable tasks, prepares biology and environment, then works with focus and determination. Things go wrong for them as for any of us, but they rely on their ability to bounce, recalibrate and recover. They engage with their whole being: physical, emotional and cognitive, dynamically playing to their strengths and working to mitigate risk areas. Resilience Mastery examines each of the 11 key factors, weaving together inspiring stories from people who have achieved success in their fields. The book suggests that, as a species, we are using outdated hardware in an upgraded environment. We're easily swayed by groupthink and clever marketing. Food scientists have discovered bliss points that make manufactured food irresistible. Behavioural scientists and UX designers have discovered technology bliss points that addict us to devices. At the core of our nervous system lies a freeze, fight and flight response. None of these help us in a brave new world. To be effective and to reach our dreams we need presence, purpose, vitality and focus. We need to upgrade the quality of the challenges we tackle so that we can align our actions with our values and purpose. We need to master skills that will enable us to live a life of vitality and, ultimately, reach our potential.

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of When: The Scientific Secrets of Perfect Timing Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of To Sell Is Human: The Surprising Truth About Motivating Others). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction-at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose-and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.
