By 1979, we knew all that we know now about the science of climate change - what was happening, why it was happening, and how to stop it. Over the next ten years, we had the very real opportunity to stop it. Obviously, we failed Nathaniel Rich's groundbreaking account of that failure - and how tantalizingly close we came to signing binding treaties that would have saved us all before the fossil fuels industry and politicians committed to anti-scientific denialism - is already a journalistic blockbuster, a full issue of the New York Times Magazine that has earned favorable comparisons to Rachel Carson's Silent Spring and John Hersey's Hiroshima. Rich has become an instant, in-demand expert and speaker. A major movie deal is already in place. It is the story, perhaps, that can shift the conversation.In the book Losing Earth, Rich is able to provide more of the context for what did - and didn't - happen in the 1980s and, more important, is able to carry the story fully into the present day and wrestle with what those past failures mean for us in 2019. It is not just an agonizing revelation of historical missed opportunities, but a clear-eyed and eloquent assessment of how we got to now, and what we can and must do before it's truly too late.

AN ENTIRE KINGDOM BUILT AROUND A SUPERNATURAL NEED FOR JUSTICE, ENFORCED BY THE WILD HUNT AND THE HOUNDS OF HELL. What would you do if you blundered into a strange world, where all around you was the familiar landscape of the Blue Ridge Mountains of Virginia, but the inhabitants were the long-lived fae, and you the only human? George Talbot Traherne stumbles across the murdered huntsman of the Wild Hunt, and is drafted into finding out who did it. Oh, and assigned the task of taking the huntsman's place with the Hounds of Hell, whether he wants the job or not. The antlered god Cernunnos is the sponsor of this kingdom, and he requires its king to conduct the annual hunt for justice in pursuit of an evil criminal, or else lose his right to the kingship, and possibly end up hunted himself. Success is far from guaranteed, and no human has held the post. George discovers his own blood links to the fae king, and he's determined to try. But Cernunnos himself has a personal role to play, and George will have to sort out just why he's the one who's been chosen for the task. And whether he has any chance of surviving the job. Find out what it's like to live in a world where you can help the Right to prevail, even if it might cost you everything. To Carry the Horn is the first book of The Hounds of Anwn.

Previously published as Ancient Science, Secret History contains 150 pages of new material. The Secret History of The World and How To Get Out Alive is the definitive book of the real answers where Truth is more fantastic than fiction. Laura Knight-Jadczyk, wife of internationally known theoretical physicist, Arkadiusz Jadczyk, an expert in hyperdimensional physics, draws on science and mysticism to pierce the veil of reality. With sparkling humour and wisdom, she picks up where Fulcanelli left off, sharing over thirty years of research to reveal, for the first time, The Great Work and the esoteric Science of the Ancients in terms accessible to scholar and layperson alike. Conspiracies have existed since the time of Cain and Abel. Facts of history have been altered to support the illusion. The question today is whether a sufficient number of people will see through the deceptions, thus creating a counter-force for positive change - the gold of humanity - during the upcoming times of Macro-Cosmic Quantum Shift. Laura argues convincingly, based on the revelations of the deepest of esoteric secrets, that the present is a time of potential transition, an extraordinary opportunity for individual and collective renewal: a quantum shift of awareness and perception which could see the birth of true creativity in the fields of science, art and spirituality. The Secret History of the World allows us to redefine our interpretation of the universe, history, and culture and to thereby navigate a path through this darkness. In this way, Laura Knight-Jadczyk shows us how we may extend the possibilities for all our different futures in literal terms. With over 800 pages of fascinating reading, The Secret History of The World and How to Get Out Alive is rapidly being acknowledged as a classic with profound implications for the destiny of the human race. With painstakingly researched facts and figures, the author overturns long-held conventional ideas on religion, philosophy, Grail legends, science, and alchemy, presenting a cohesive narrative pointing to the existence of an ancient techno-spirituality of the Golden Age which included a mastery of space and time; the Holy Grail, the Philosopher's Stone, the True Process of Ascension. Laura provides the evidence for the advanced level of scientific and metaphysical wisdom possessed by the greatest of lost ancient civilizations - a culture so advanced that none of the trappings of civilization as we know it were needed, explaining why there is no 'evidence' of civilization as we know it left to testify to its existence. The author's consummate synthesis reveals the Message in a Bottle reserved for humanity, including the Cosmology and Mysticism of mankind Before the Fall when, as the ancient texts tell us, man walked and talked with the gods. Laura shows us that the upcoming shift is that point in the vast cosmological cycle when mankind - or at least a portion of mankind - has the opportunity to regain his standing as The Child of the King in the Golden Age. If ever there was a book that can answer the questions of those who are seeking Truth in the spiritual wilderness of this world, then surely The Secret History of the World and How to Get Out Alive is it.

Freely meets The Expanse in a future where humanity has destroyed the Earth through ecological disaster and warfare, and a totalitarian state prevents any access to their home... Environmental disasters and AI armies have caused the human population of Earth to flee. They lie scattered across space stations and colonies, overcrowded and suffering. The Earth is cut off by the Interdiction Zone: a network of satellites that prevents any escape from the planet. The incredible cost of maintaining it has crippled humanity, who struggle under the totalitarian yoke of the Sol Commonwealth government. Many have been driven to the edge of society, taking any work offered, criminal and otherwise, in order to survive. The crew of the Arcus are just such people. Through the Interdiction Zone, a world of priceless artifacts awaits, provided anyone is crazy enough to make the run. With fuel running low and cred accounts even lower, the Arcus' survival might depend on taking the job. Yet on arrival on Earth, the crew discovers that what remains of their world is not as they have been told, and the truth may bring the entire Sol Commonwealth tumbling down....
