It's the storm of the century, and Preeti Namesh and her family are snowed in. That means she's home from school, but she can't even leave to visit her friends! Preeti thinks it's going to be the most boring vacation ever--that is, until magical pony Comet shows up! Comet is on a hunt to find his missing twin sister Destiny. Can Preeti help Comet rescue Destiny, or will the snow sabotage their winter wishes?

Charlie Engle's "fascinating account of the high and low points of his life as an ultramarathon runner...is uplifting and inspirational" (Publishers Weekly) as he describes his globe-spanning races, his record-breaking run across the Sahara Desert, and how running helped him overcome drug addiction--and an unjust stint in federal prison. After a decade-long addiction to crack cocaine and alcohol, Charlie Engle hit bottom with a near-fatal six-day binge that ended in a hail of bullets. As Engle got sober, he turned to running, which became his lifeline, his pastime, and his salvation. He began with marathons, and when marathons weren't far enough, he began to take on ultramarathons, races that went for thirty-five, fifty, and sometimes hundreds of miles, traveling to some of the most unforgiving places on earth to race. The Matt Damon-produced documentary, Running the Sahara, followed Engle as he lead a team on a harrowing, record breaking 4,500-mile run across the Sahara Desert, which helped raise millions of dollars for charity. Charlie's growing notoriety led to an investigation and a subsequent unjust conviction for mortgage fraud for which he spent sixteen months in federal prison in Beckley, West Virginia. While in jail, Engle pounded the small prison track, running endlessly in circles. Soon his fellow inmates were joining him, struggling to keep their spirits up in dehumanizing circumstances. In Running Man, Charlie Engle tells the surprising, funny, and emotional story of his life, detailing his setbacks and struggles--from coping with addiction to serving time in prison--and how he blazed a path to freedom by putting one foot in front of the other. "A fast-paced, well-written account of a man who accepts pain, pushes beyond imagined limits, and ultimately finds redemption and peace" (Booklist), this is a raw and triumphant account about finding the threshold of human endurance, and transcending it.

This volume presents the proceedings of the first major international conference for over twenty years on the state-of-the-art of ground anchorage technology. Leading researchers and practitioners from around the world came together to discuss all the aspects of design, construction and performance of ground anchorages for the use in stabilisation of structures, excavations and slopes. Practical issues relating to construction and installation of anchorages are considered in a series of examples of engineering projects from around the world. Reviews of new national and international standards of construction are also presented along with current practice in different countries.

This updated and expanded edition of Creative Homeowner's comprehensive, bestselling plumbing how-to book covers the most up-to-date products and techniques. Strong emphasis in the how-to information is placed on doing things correctly, so all of the projects use only code-compliant techniques. Ultimate Guide: Plumbing, 4th Edition prepares the do-it-yourselfer to handle any plumbing task in the home, from replacing a washer in a leaky faucet to renovating a bathroom. It also gives readers an overview of a house's plumbing system, including supply, waste, and vent piping, and explains the basic physics that keep everything working well. In addition to learning how to plan and complete each project, readers learn how to spot and improve outdated or dangerous techniques and materials in their home plumbing system.

Water plays a vital role in shaping our built environment, as it has done for centuries. We depend on it, we use it, we live with it and we must respect it. Aquitecture is the first book to outline new ways of 'designing for water,' using examples from around the world to illustrate methods of utilizing water innovatively, efficiently and safely. The first part of the book explores the historical relationship between water and architecture, examining how cities and civilisations have been drawn to water and have attempted to control it. The chapters go on to assess how this relationship has changed over time, and introduce readers to a range of brand new techniques that will revolutionise the way we think about water, design and urban planning. Solutions such as amphibious housing, wet-proof buildings, zero carbon development, rain gardens, flood storage and new methods of waterfront design are discussed and their effectiveness assessed. Full colour illustrations and international case studies are used throughout the book to bring these new theories to life; practical, technical advice sits alongside truly ground-breaking and ambitious ideas for the future. This book is an ideal reference tool for all architects, urban designers, planners and sustainability experts who have an interest in creating a beautiful, sustainable, intelligent and pleasurable built environment on land, in water and with water.

CIMA Exam Practice Kits consolidate learning by providing an extensive bank of practice questions. Each solution provides an in depth analysis of the correct answer and highlights why the alternatives are incorrect. CIMA Exam Practice Kits are ideal for students studying independently or attending a tutored revision course. It supplements the Official CIMA Study Systems and CIMA Revision Cards with a wealth of additional questions and material focused purely on applying what has been learnt to passing the exam. CIMA Exam Practice Kits help students prepare with confidence for exam day, and to pass the new syllabus first time. * Helps CIMA students to prepare and pass the new syllabus first time * Practice applying and displaying knowledge so CIMA examiners can award you marks * Provides worked answers to fully explain the correct answer, and analysis of incorrect answers - helping CIMA students avoid common pitfalls
